

2023-2024 Legal and Illegal Parts List

How To Use This Document:

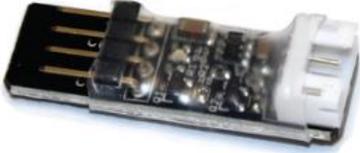

The Legal and Illegal Parts List is intended to provide visuals of the most common legal and illegal parts. This document is to serve as a guide; however, it is **NOT** an all-inclusive list. Teams and volunteers should be sure to read all of the robot build rules in the [Game Manual Part 1](#), and should always reference the [Game Q&A forum](#) for additional build rule clarifications.

<p>COTS Parts (No Images Available) <RM01>, <RM02></p>	<p>Teams may use additional materials and COTS (Commercial Off The Shelf) components to construct their robots subject to the following restrictions:</p> <ul style="list-style-type: none"> • All raw materials are allowed provided they are readily available to all teams from standard distributors (for example, McMaster-Carr, Home Depot, Grainger, AndyMark®, etc.). • All post-processed materials are allowed provided they are readily available to the majority of teams from standard distributors (for example, McMaster-Carr, Home Depot, AndyMark®, etc.). • COTS parts and assemblies may only have a maximum of a single degree of freedom. It is the intent of <i>FIRST</i> that teams design and build their devices to achieve the game challenge. Assemblies of COTS components, such as linear slides, and gearboxes are allowed while a pre-fabricated gripper assembly designed to grab the game elements is not. Exceptions to this rule are: <ul style="list-style-type: none"> ○ COTS drive chassis (for example, AndyMark TileRunner, REV Mecanum Drivetrain Kit, TETRIX Flex-Build Robot Chassis, etc.) are allowed provided none of the individual parts violate any other rules. ○ Dead-wheel Odometry Kit – a combination of an encoder, a free-spinning omnidirectional wheel, an optional tensioner, and an enclosure used to accurately measure the wheel’s rotation. ○ Holonomic wheels (omni or mecanum) • Raw materials, and COTS may be modified (for example, drilled, cut, painted, etc.) provided no other rules are violated.

NPT1050	HiTechnic Prototype Board - Solderable	

The following parts are ILLEGAL for the 2023-2024 FIRST Tech Challenge

Part Number	Description	Picture / Diagram
NPT1055	HiTechnic Prototype Board - Solderless	 A green printed circuit board (PCB) with a white USB-A connector on the right side. It features several circular pads and a central microcontroller chip. The board is designed for prototyping without the need for solder.
SPR2010	HiTechnic Super Prototype Board	 A green PCB with two white USB-A connectors, one on the left and one on the right. It has a central microcontroller chip and various electronic components. The board is designed for prototyping with a standard USB connection.
